

# SUPERIOR S90-R CASE SEALER

## BENEFITS

- The S50-BB Random Case Sealer is the best choice for production environments in which case size changes constantly. It is commonly used to meet the demands of sealing the continuously varying carton sizes utilized in distribution centers and by general merchandise co-packers who fulfill multiple orders that require constantly changing box sizes, sealed quickly and securely.

The Superior S90-R Random Case Sealer is designed to be the most helpful piece of equipment on your production floor. There is no changeover between box sizes when you have the S90-R. It is a very rugged system with top and bottom belts to securely and powerfully turn your case sealing into a quick, complete, inexpensive and almost effortless part of your production process. Additionally, when you order your S90-R you have the opportunity to purchase a fully integrated inkjet coding system at a tremendous savings to make your case coding and sealing an incredibly efficient one step process.

The S90-R comes complete, already loaded with everything you might want for options. Its front and rear roller packing tables make your production easy and simple—it is no problem for your operators to feed the system, or to transfer your sealed case to a collecting conveyor or a pallet. It is already supplied with swivel locking casters so you can roll it into place and lock it down for production with very little effort. Its automatically self centering guide rails mean that you can change over almost instantly from one size box to another.
