

# MAMUTH SB70 LARGE / TALL CASE SEALER

## BENEFITS

- The MAMUTH SB70 Large and Tall Case Sealer is the best choice for securely sealing not only common case sizes, but also your large, tall or narrow cartons. It is commonly used to meet the special demands of sealing the larger carton sizes often utilized in the food, beverage and electronics industries. The top and side belts insure that the SB70 manages both heavy and very light cases smoothly without crushing or torsion.

The MAMUTH SB70 Large and Tall Case Sealer is designed to be the most efficient piece of equipment on your production floor. It is a rugged, heavy gauge system utilizing both top and side belts driven by three motors (one motor for the top belts and one motor for each side belt) to securely and powerfully turn your case sealing into a quick, complete, inexpensive and almost effortless part of your production. When you order your MAMUTH you have the opportunity to purchase an inkjet coding system at a tremendous savings to make your case coding and sealing an efficient one step process.

The SB70 comes complete, already loaded with everything you might want for case sealing options. Its front and rear roller packing tables make your production easy and simple—it is no problem for your operators to feed the system, or to transfer your sealed case to a collecting conveyor or a pallet. It is already supplied with swivel locking casters so you can roll it into place and lock it down for production with very little effort. Its self centering side belts mean that you can change over very easily from one size box to another in a matter of a couple of minutes.
