

MAMUTH BB VERSATILE CASE SEALER

BENEFITS

- The MAMUTH BB Versatile Case Sealer is the best choice for most production environments. It is commonly used to meet the demands of sealing the majority of the carton sizes found in food and beverage and in many other industries.
- The BB comes complete with carton top squeezers to create a secure top flap closure while eliminating gaps between the flaps, and infeed and outfeed tables to make your case sealing operation as simple and convenient as possible.

The MAMUTH BB Versatile Case Sealer is designed to be the most efficient piece of equipment on your production floor. It is a rugged, heavy gauge system utilizing both top and bottom belts driven by two motors (one motor for the top belts and one motor for the bottom belts) to securely and powerfully turn your case sealing into a quick, complete, inexpensive and almost effortless part of your production process. Additionally, when you order your sealer you have the opportunity to purchase a fully integrated inkjet coding system at a tremendous savings to make your case coding and sealing an incredibly efficient one step process.

The BB comes complete, already loaded with everything you might want for case sealing options. Its front and rear roller packing tables make your production easy and simple. It is no problem for your operators to feed the system, or to transfer your sealed case to a collecting conveyor or a pallet. It is already supplied with both casters and stabilizing / leveling feet so you can roll it into place and then lock it down for production with very little effort. Its self centering guide rails and multiple crank handles mean that you can change over smoothly and easily from one size box to another in a matter of seconds.
